

## Claims:

1. An ink-storing member for a writing instrument which stores an ink for a writing instrument, wherein the above ink-storing member for a writing instrument comprises a  
5 multilayer structure comprising an organic high molecular compound layer constituted of an organic high molecular compound and an inorganic compound layer constituted of an inorganic compound.
- 10 2. The ink-storing member for a writing instrument as described in claim 1, wherein the ink-storing member for a writing instrument has a parallel light transmittance of 50 % or more.
- 15 3. The ink-storing member for a writing instrument as described in claim 1 or 2, wherein the inorganic compound layer is constituted of at least one compound selected from the group consisting of inorganic compounds of SiO, SiO<sub>2</sub>, Al<sub>2</sub>O<sub>3</sub>, CaF<sub>2</sub>, SnO<sub>2</sub>, CeF<sub>3</sub>, MgO, ZnO, TiO<sub>2</sub>, MgAlO<sub>4</sub>, In<sub>2</sub>O<sub>3</sub>,  
20 SrCu<sub>2</sub>O<sub>2</sub>, CuInO<sub>2</sub>, CuInSe<sub>2</sub> and ITO.
4. The ink-storing member for a writing instrument as described in any of claims 1 to 3, wherein the ink-storing member for a writing instrument has an oxygen  
25 permeability of 10 cc/m<sup>2</sup>·Day·atm or less at 24°C and

65 %RH and a steam permeability of  $10 \text{ g/m}^2 \cdot \text{Day} \cdot \text{atm}$  or less at  $40^\circ\text{C}$  and 90 %RH.

5        5.    The ink-storing member for a writing instrument as described in any of claims 1 to 4, wherein the ink-storing member for a writing instrument is obtained by sticking on a molded article comprising an organic high molecular compound, a multilayer film obtained by coating an inorganic compound layer on one face of an organic  
10       high molecular film by any one method of a deposition method, a sputtering method, an ion plating method, a plasma method and a chemical vapor deposition method and coating an adhesive layer on the other face.

15       6.    The ink-storing member for a writing instrument as described in any of claims 1 to 5, wherein the ink-storing member for a writing instrument is an ink-storing vessel or an ink-storing tube for a writing instrument.
